**UPS APPLAUDS RELEASE OF TAX REFORM BILL THAT WOULD MAKE AMERICAN
BUSINESSES
MORE COMPETITIVE**

Urges Quick Legislative Action

UPS (NYSE: UPS), a global logistics provider and leading advocate for tax reform, commends Congressional leaders on the release of The Tax Cuts and Jobs Act, the next step in creating a simpler, but comprehensive tax system to stimulate the economy, create jobs and develop a globally competitive tax structure. We stand ready to work with Congress to help support a bill that will fix our broken tax code and move the country forward on a policy proposal that recognizes the need for a globally competitive tax rate and a modern international tax system. We hope Congress will enact tax reform before the end of the year to unlock the opportunity to make America more competitive in the global marketplace.
